AMENDMENTSIn the Claims:

Please amend the claims as follows:

sub B3
1. (Amended) A computer-driven information management system for selectively matching credit applicants with money lenders through a global communications network, said system comprising:

applicant data entry means for entering applicant data into the system, and defining an electronic applicant profile of a credit applicant seeking financing;

model data entry means for entering model data into the system, said model data being established by the lender and defining an electronic model profile representing characteristics of a desired applicant;
